MATERIAL DATASHEET

INTRODUCTION

AluEntry Foil is a solid Aluminium drill entry sheet specifically manufactured for use in drilling all single sided, double sided and multilayer circuit boards.

PRODUCT CHARACTERISTICS

- Excellent thermal characteristics, cooling the drill bit and reducing resin build up.
- Manufactured from hard drawn aluminium, maximising machinability whilst maintaining high thermal conductivity and burr reduction.
- Excellent flatness and controlled surface roughness, combines to provide for reliable drill centring, reduced wander and drill breakages.
- Protects the underlying substrate from pressure foot marks and scratches.
- AluEntry Foil is fully recyclable

TECHNICAL DATA

Metal Alloy	A1100 H18	Tensile Strength	>170Mps
Thickness	0.2mm	Warpage	<1% of diagonal
Thickness Tolerance	+/-10%	Size Tolerance	+/-1mm
Delivery Specification	AluEntry Foil is supplied in cut panels to customer requirements
