

A125/G125

ST Type Slot Drill

Design Feature

Drill type: ST type, double flute double edges slot drills
High rigidity and excellent overall performance

Application

Suitable for slot drilling, especially for long slots

Benefit

Excellent slot shape with low occurrence of burrs

*Drill bit in diameter 0.25~1.00mm belongs to A125 series and 1.05~2.50mm belongs to G125 series.

*Able to add lubricated coating

*Normal specification is shown in the table, please ask sales for customized specification
